

Vishwajeet Singh

Software Engineer

Software Engineer with 4+ years of experience in designing, developing and implementing innovative software solutions. Proficient in Python with a strong background in data domain. Committed to continuous learning and staying current with industry trends and technologies.

WORK EXPERIENCE

Software Engineer

Jul 2024 – Present

Incture Technologies, Bengaluru, IN

Project #3 (IWM Chatbot)

Tools/Framework: Python, Open AI Services, Langchain, SAP Hana DB, MySQL DB

- Developed a GenAI-driven IWM chatbot leveraging GPT-3.5 LLM and LangChain, integrated with SAP HANA DB and MySQL DB.
- Implemented contextual prompting techniques to enable the LLM to interpret and execute complex database queries.
- Designed and deployed conditional prompting strategies in LangChain to dynamically generate SQL queries based on user input and context.
- Utilized prompt chaining with LangChain to enable the AI system to understand and analyze historical context.
- Collaborated with cross-functional teams to integrate AI solutions into existing workflows, ensuring seamless operation and user satisfaction.

Associate Software Engineer

Jun 2022 – Jul 2024

Incture Technologies, Bengaluru, IN

Project #2 (Onboarding Assistant)

Tools/Framework: Python, Azure Open AI Services, Langchain, SAP Hana DB, LLM

- Built a GenAI-driven application leveraging GPT-4 and Falcon-40B LLMs, automating workflows and reducing manual effort in onboarding processes.
- Implemented Retrieval-Augmented Generation (RAG) using LangChain, enabling the assistant to access and retrieve relevant information from documents.
- Applied chunking techniques in LangChain to split documents into smaller sections for efficient processing and retrieval.
- Designed prompt engineering strategies with LLMs and LangChain to retrieve context-aware information from document chunks.
- Developed REST APIs and collaborated with the frontend team to seamlessly integrate AI solutions into existing workflows.

Project #1 (Data Engineering)

Tools/Framework: Python, Azure Synapse Analytics, Azure Data Factory, Azure Data Lake, Azure SQL Server, Azure Logic App, Power BI

- Designed and implemented a robust data engineering pipeline on Azure to process and analyze large datasets for healthcare companies.
- The project aimed to enhance data accessibility and improve reporting capabilities.
- Implement a scalable and secure data storage solution using Azure Data Lake Storage and Azure SQL Database.
- Used Azure Data Factory for data transformation and ETL processes to prepare data for analysis.
- Used Azure Synapse Analytics for writing a notebook and creating a pipeline.
- Enable advanced analytics using Azure Synapse Analytics and Power BI for real-time reporting and visualization.

Internship

Jan 2022 – Jun 2022

Incture Technologies, Bengaluru, IN

- Collaborated with the development team to design, code, test, and debug software applications. Wrote clean, efficient and maintainable code.
- Assist in documenting software requirements, specifications and processes. Participated in testing activities including unit testing and bug fixing.
- Worked closely with a team of 12 members, participating in meetings and discussions. Effectively communicated progress, challenges and ideas within the team.

CONTACT

SKILLS

Programming:

- Python
- SQL

Generative AI:

- Prompt Engineering
- LLM, Agents, Fine Tuning
- RAG, LangChain, LangGraph
- Open AI, Claude, Hugging Face, Llama

Data Visualizations:

- Power BI
- Tableau
- SAP SAC

AI/ML & Data Analytics:

- Pandas, Numpy
- Tensorflow, Pytorch
- Scikit-learn, Matplotlib/Seaborn
- NLP, Pipelines, ETL Process

Tools and Frameworks:

- PySpark, Vector DB
- MySQL, SQL Server
- Docker, Git, Fast API
- Azure, AWS, SAP DataSphere

EDUCATION

Motilal Nehru National Institute of Technology, Prayagraj (NIT Allahabad)

Master of Computer Application

CPI: 8.02/10

May 2022

CERTIFICATIONS

- [Data Engineering Certification](#)
- [AWS Data Engineering Certification](#)
- [Data Science Certification](#)
